## Crèche Policy

As an Ofsted Registered Childminder it is vital that I keep up to date with the latest requirements laid out by Ofsted.

In order to do this I need to attend training organized by the local authority.

Sometimes the training is during the working day and rather than inconvenience you by asking to take half days off I can put your child in the crèche.

I will only put children in a crèche if I have their parents signed permission.

I will always remain in the same building as the crèche and be available in the event of any emergency.

I will ensure that the children are given time to settle into their new surroundings before leaving them.

I will ensure that the Crèche staff are fully informed of the individual needs of the children (including allergies etc)

I will only use a crèche that is organized by the Local Authority and only to allow me to undertake professional development training.
